4001 4011 4021 Centrifugal Pumps

End Suction Frame Mounted

eming End Suction Centrifugal pumps are designed to handle a wide range of fluids. All pumps are furnished with right hand rotation as standard, left hand rotation (counter-clockwise) optional. Pumps are available in the following sizes:

Fig. 4001 - 1, 1¹/₂, 2¹/₂ Fig. 4011 - 1¹/₄S, 1¹/₂S, 2S, 1¹/₂M, 2M, 3M, 4M Fig. 4021 - 11/2L, 11/2M, 2M, 3M, 4M, 5M, 5MS, 6M, 6ML Fig. 4021H - 11/4S, 11/2S, 2S, 2M, 3M, 5M, 6M, 6ML

Semi-Open Impeller:

Impeller design permits passage of dirty liquids and/or liquids containing foreign material. Running clearance between suction side of impeller and casing

is adjustable to regulate capacity or compensate for wear. This axial adjustment feature is standard on all sizes. The 4000 Series impellers have wiping vanes on balance side and are suitable for handling liquids with lime, chips, or other similar solids, which tend to coat metal surfaces or clog space between casing and impeller.

NOTE: Wiping vanes are not available on Fig. 4021H, Size 6ML

Available with packed stuffing box or mechanical seals in single, single with choker ring & double seal configurations.

Capacities to 1500 GPM Heads to 250 Feet 1" - 6" Discharge

FEATURES:

- Packing Box or Mechanical Seal
- Adjustable Impeller (1¹/₂S or 2S)
- All Iron
- **Bronze Fitted**
- All Bronze
- **Stainless Steel Impellers**

Suction Side

Balance Side

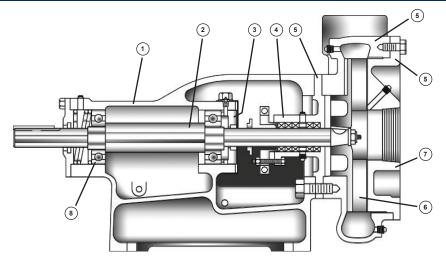

Deming 4000 Series

Design Features:

- 1. Frame Heavy duty cast iron with precision bore provides rigid support for rotating assembly.
- 2. Shaft Large diameter shaft supported by two widely spaced ball bearings provides smooth quiet operation.
- 3. Shaft Adjusting Nut Permits axial adjustment of impeller - for regulation of capacity and head and to compensate for wear without dismantling pump.
- 4. Stuffing Box Furnished as standard with packing rings, lantern ring and a solid gland. Seal heads are used for mechanical seals.
- 5. Liquid End Three-piece assembly with separate suction head permits easy access to impeller, low cost maintenance. Standard cast iron construction designed for working pressure of 150 psi. Can be manufactured of other materials such as (AI, AB, BF) to meet special applications without changing power end.
- 6. Impeller Semi-open adjustable impeller with extra heavy vanes gives outstanding performance and wear resistance. Impeller keyed to shaft with

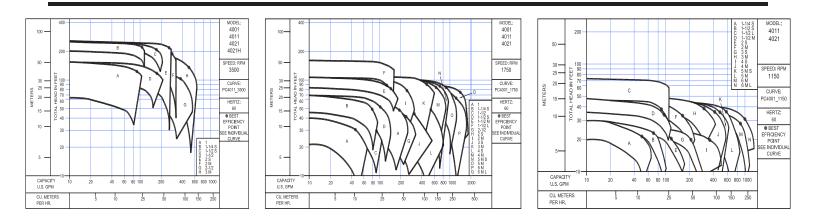

precision taper fit to assure easy impeller removal and perfect alignment.

- 7. Suction Head Separately removable, permits inspection and servicing without disturbing discharge piping or pump alignment.
- 8. Bearings Two widely spaced ball bearings provide solid shaft support. Fig. 4021 frame has a double row bearing at the stuffing box end. Fig. 4021H frame has larger shaft with double row

bearings at both ends. Interchangeability:

Figs. 4011, 4021, and 4021H power frames are each suitable for several sizes of liquid ends. In addition, Figs. 4011, 4021, and 4021H liquid ends thru 3" are interchangeable. This permits 4011 liquid ends to be assembled on 4021 power frames thus providing a much heavier pump for heavy duty service.
